# THE COMPANY

Felix Kunz Chairman and CEO

## World-wide technological leader

DIGITAL-LOGIC not only develops, produces and markets computer modules and computer boards but also complete MICROSPACE® computer systems using embedded computer technology. These computer systems are PC compatible, extremely energy efficient, noiseless, incredibly robust and very small. x86 compatibility allows the use of all the usual PC software and operating systems (Windows, Linux, RT-OS, DOS).

Founded in 1992, the Swiss high-tech company DIGITAL-LOGIC continually supplies the world-wide embedded computer market with its innovative products. The MICROSPACE® computer systems work with a large input voltage range from 12-110VDC and 240VAC and in a broad temperature range in part from -40 to +85 degrees Celsius. This is achieved through a patented passive cooling method. The casing is manufactured with a shaped aluminum alloy or stainless chromium steel whereby the high durability and watertightness is achieved.

DIGITAL-LOGIC also leads in the development of standards used worldwide such as the PCI/104-express bus and smartCoreExpress modules.

## Long-term availability

When choosing component parts, DIGITAL-LOGIC engineers pay special attention to their long-term availability. Flip chips from the embedded long-life programs of AMD and Intel are mostly used. All software codes (BIOS, drivers) are on hand as source codes to ensure very long-term support. DIGITAL-LOGIC products are available for a minimum of 5 years and practically for up to 10 years. All SMX945 and Atom based computer systems can be scaled for future computer technology. The SMX945 can be scaled with the SMXG45 or SMX945-N270; within a year the SMA200 (Atom) will be scaled with the next Atom generation (more performance with less power consumption).

## MICROSPACE® computer systems for mobile applications

Computer systems for mobile applications have additional demands made on them. The hard disk is replaced by a solid-state drive (up to 32GB). Board voltages (vehicle, rail, aircraft) require protective circuits against over and under voltage which are defined in special standards (see the standards overview). With every mobile application, the lowest possible power consumption is expected. Therefore, in vehicle computers, the current demand in the off-state is reduced to under 1mW. All mobile computers have GPS (satellite navigation), WLAN and GSM (UMTS) functions available (optional).

## The company

DIGITAL-LOGIC operates worldwide and exports over 90% of their Swiss-made computer products. The computer boards are manufactured on automated assembly lines, then inspected and tested, and finally made into computer systems. Pentium-M, Multicore and Atom processors from Intel are used. Quality management is ISO-9001 certified and the products have application-specific accreditation (vehicle license e1, rail standard EN50155, medical license EN60601). All products are RoHS compliant. The company employs in their headquarters in Luterbach approximately 110 workers plus 16 apprentices and approximately 10 people in their subsidiaries. DIGITAL-LOGIC is represented worldwide through subsidiaries and distribution partners.

## Product support

Each computer system has available a configurations log in its internal database. All serial numbers, configuration dates and manufacture dates are stored and, in the case of service, updated. During manufacture, all individual component data are automatically captured allowing complete traceability. The standard guarantee is 24 months which can be extended to 36 months if desired.

## The MICROSPACE® computer systems market segment

DIGITAL-LOGIC manufactures specially designed computer systems for its target markets which optimally and individually satisfy the application profiles of the individual markets. Consequently, reliable operation with high availability (high MTBF) is a given.

### The industrial market

The MICROSPACE® computer systems for the industrial market cover applications for measurement engineering, for industrial automation and control, and include data capture for stationary information terminals (POI). Power supply is through the 12V or 24V PLC or with a power adaptor (110/220VAC). Mounting possibilities include desktop, DIN top-hat rails, 19" or wall mounts. The MPCV product family can also be easily expanded with additional options.

## Medical market

The MICROSPACE® computer systems for the medical field are EN60601 certified and fulfill security restrictions so that if patient contact occurs there will be no improper high current flow. The systems possess medical grounding clamps and are insulated accordingly. Systems have been installed in operating theaters and intensive care stations but also in doctor's offices and patient's rooms.

## Vehicular market

MICROSPACE® computer systems for mobile use in vehicles (battery input of 12V, 24V, 28V, 42V) have e1 clearance and function in a broad temperature range. The input power packs coded V1248 are especially protected in vehicular environments (overcurrent, overvoltage, current reduction at motor start, reverse polarity protection). Special automotive hard disks, CompactFlash or solid-state drives are used as mass storage devices. These computers include optional GPS, GSM-UMTS and WLAN.

## Rail market

The MICROSATE® computer systems for rail applications fulfill the EN50155 rail standard and function on inputs of 24VDC to 110VDC. In addition, certified and insulated power supply packs are used (voltage code I24-I110). Together with a SSD mass storage device, these computers function from -40 to +85 degrees Celsius. All fittings are coded and lockable. The temperatures and voltages are monitored and logged. Redundant supplies, interfaces and battery buffering are options. These computers include optional GPS, GSM-UMTS and WLAN.

## Military market

The MICROSATE® computer systems for military applications are extremely robust and protected. The MPCX27MIL computer can therefore be totally immersed in water. Military connectors are used. The operating temperature range is -40 to +85 degrees Celsius and achieves the highest vibration and shock resistance. Additionally, a 3D acceleration sensor is built into the MPCX27MIL product family allowing measurement in each axel of values from 1mG to 6G. For expandability, a PCI/104-Express slot is available with 48 reserve input and output signals over a MIL connector. These computers include optional GPS, GSM-UMTS and WLAN.

## Vibration

The computer systems are tested for vibration and shock resistance in accordance with IEC68-2-6, respectively MIL-STD-810E. They are tested on the vibration test stand between 1Hz and 1kHz and with acceleration values up to 2G. With the MPCX47, MPCR50R, the hard drive is mounted on special vibration dampers so it can also be used in vehicles.

For applications with very strong vibrations, the computer systems can be equipped with a Solid State Disk which allows vibrations up to 16G, shock resistance to 1500G and extreme working temperatures in the range of -40°C to +85°C (MPCX27).

## IP protection classes

Industrial systems are subject to different stress than desktop PCs in an office environment. For industrial usage, protection classes and standards are defined which specify the environmental loads a system can be subjected to without suffering damage with regard to contact and protection from foreign bodies/moisture. The protection classes are defined in the IP standard, DIN EN 60529: Housing protection classes (IP code).

The IP code consists of a two-digit number combination that indicates the respective protection level, e.g. IP54. The first digit, 5, specifies the protection class for contact and foreign body protection; the second digit, 4, specifies water and moisture protection. The MPCX27MIL is rated IP67 and therefore has maximum protection from moisture.

Example: IP **5** (4)

<b>5</b>	<b>Protection from hard objects</b>
<b>IP</b>	<b>TESTS</b>
<b>0</b>	no protection
<b>1</b>	 Protection from objects that are bigger than 50mm (e.g. unintentional hand contact)
<b>2</b>	 Protection from fixed objects that are bigger than 12.5mm (e.g. finger of a hand)
<b>3</b>	 Protection from fixed objects that are bigger than 2.5mm (e.g. tools/cables)
<b>4</b>	 Protection from fixed objects that are bigger than 1mm (e.g. tools/small cables)
<b>5</b>	 Protection from dust (no damaging deposits)
<b>6</b>	 Full protection against dust

<b>4</b>	<b>Protection from liquids</b>
<b>IP</b>	<b>TESTS</b>
<b>0</b>	no protection
<b>1</b>	 Protection from vertically falling water droplets (condensation)
<b>2</b>	 Protection from water droplets falling at an angle of 15° in relation to vertical
<b>3</b>	 Protection from water droplets falling at an angle of 60° in relation to vertical
<b>4</b>	 Protection from water droplets from all directions
<b>5</b>	 Full protection from water jets with the equivalent force of large waves
<b>6/7</b>	 Protection against strong hose water/protection against temporary immersion in water

## Temperature Requirements of EN50155 Standard

### Isolation Requirements of EN50155 Standard

Railway electronic equipment shall be protected against dielectric strength through different isolation barriers. The levels are defined in different standards such as EN50155, NF F 670001 or NF F 05-510 and are resumed in the following table.

Category	Internal cabinet temperature range	Ambient board temperature range
T1	-25°C / +55°C	-25°C / +70°C
T2	-40°C / +55°C	-40°C / +70°C
T3	-25°C / +70°C	-25°C / +85°C
TX	-40°C / +70°C	-40°C / +85°C

Input Nominal	Rolling stock EN50155 requirements	Rolling stock NF F 670001 requirement	Ground equipment NF F 05-510 requirements
24 VDC	500Veff/50Hz/1min.	group A : 1500Veff./1min.	2000Veff./50Hz/1min.
48 VDC	500Veff/50Hz/1min.	group A : 1500Veff./1min.	2000Veff./50Hz/1min.
72 – 125 VDC	1000Veff/50Hz/1min.	group A : 1500Veff./1min.	20500Veff./50Hz/1min.
125 – 315 V	1500Veff/50Hz/1min.	group A : 1500Veff./1min.	2000Veff./50Hz/1min.

Surges immunity (see table below)	EN 61000-4-5 or IEC-801-5	Level : 2kV condition B Impedance 42 Ohm	Level : 1,8 kV	/
Conducted disturbances induced by radio frequency fields immunity (150KHz-80MHz) (DC power port and I/O port)	EN50141 or EN 61000-4-6 EN50121-4	Level : 3V condition A Modulation 80% AM Impedance 150 Ohm Level : 10V condition A	/	/
Damped oscillatory magnetic field immunity	EN 61000-4-10	Level : 30 A/m condition B	/	/

## Surge Requirements

Railway electronic equipment shall be protected from surges either directly induced or indirectly coupled such that no damage or failure occurs during operations. The magnitude, duration and source impedance of these surges for design purposes are defined in EN 50155, RIA 12 or the international standard IEC-801-5 renamed EN61000-4-5 as follow :

	EN50155 standard			BRB/RIA 12 standard			EN61000-4-5 standard		
	Level	Waveform	Source impedance	Level	Waveform	Source impedance	Level	Waveform	Source impedance
Direct spikes Line to line coupling	1.800 V 1.800 V	5/50 $\mu$ s 5/50 $\mu$ s	100 W 5 W	800 V 1.500 V 3.000 V 4.000 V	10/100 $\mu$ s 5/50 $\mu$ s 0,5/5 $\mu$ s 0,1/1 $\mu$ s	5 W 5 W 100 W 100 W	1 : 500 V 2 : 1.000 V 3 : 2.000 V 4 : 4.000 V	1,2/50 $\mu$ s 1,2/50 $\mu$ s 1,2/50 $\mu$ s 1,2/50 $\mu$ s	2 W 2 W 2 W 2 W
	8.400 V	0,05/0,1 $\mu$ s	100 W	7.000 V	0,05/0,1 $\mu$ s	100 W			
Direct spikes Line to earth coupling	1.800 V 1.800 V	5/50 $\mu$ s 5/50 $\mu$ s	100 W 5 W	800 V 1.500 V 3.000 V 4.000 V	10/100 $\mu$ s 5/50 $\mu$ s 0,5/5 $\mu$ s 0,1/1 $\mu$ s	5 W 5 W 100 W 100 W	1 : 500 V 2 : 1.000 V 3 : 2.000 V 4 : 4.000 V	1,2/50 $\mu$ s 1,2/50 $\mu$ s 1,2/50 $\mu$ s 1,2/50 $\mu$ s	12 W 12 W 12 W 12 W
	8.400 V	0,05/0,1 $\mu$ s	100 W	7.000 V	0,05/0,1 $\mu$ s	100 W			

# STANDARDS

## EN60601-1 Standard for Medical Devices

### The discharge current

- \_ The office device standard DIN EN60950 allows a discharge current of up to 3.5mA for „normal PCs“
- \_ The DIN EN60601-1-1 (VDE0750 Part 1) allows a maximum discharge current of 0.5mA for the protection of patients, users and 3rd parties.

## EN60601 Compliant Interfaces

### EN60601 Serial Interfaces

On the MPCV200M, COM1/2 is galvanically isolated against 500V external using an optical coupler. This results in 100% protection against unwanted discharge currents. For the MPC50M, galvanically insulated COM interfaces can be built in.

### EN60601 USB Interfaces

The MPCV200M USB input (5V, 0.5Amp) is galvanically isolated external using a DC/DC converter on the USB interface. This gives 100% protection against unwanted discharge currents. The differential USB data lines are protected against overvoltage. On the MPC50M, the USB interfaces are mechanically protected against contact.

### EN60601 LAN Interfaces

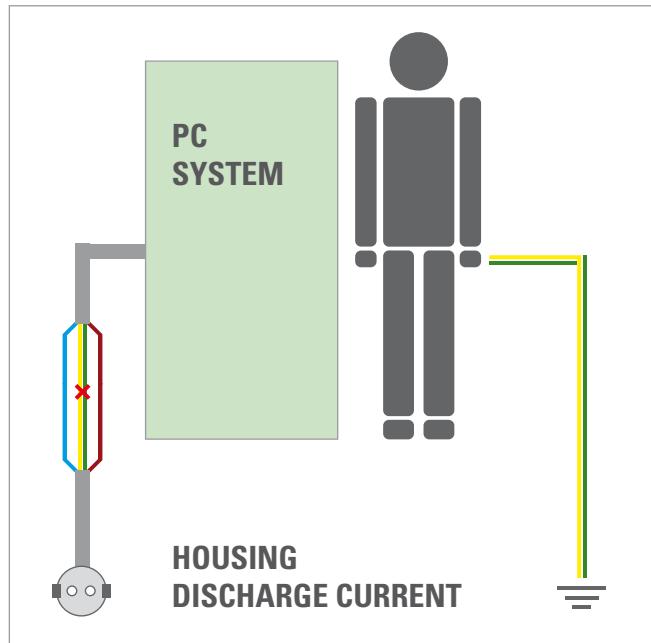

On the MPCV200M, MPC50M and all MICROSPACE® computer systems, the LAN interfaces use a transformer for galvanic external insulation. This results in 100% protection against unwanted discharge currents

### EN60601 PS2 Interfaces

There are no PS/2 interfaces on the MPCV200M and MPC50M.

### EN60601 FireWire Interfaces

The MPC50M FireWire interfaces are decoupled with a capacitor. The 12V FireWire supply must not be taken from the MPC50M but is generated from a peripheral device using a power adaptor. This gives 100% protection against unwanted discharge currents.

### EN60601 Audio and Video Interfaces

These interfaces are not within possible contact with patients and are therefore not isolated.

### Computer for Hygiene Environments (medicine, food products)

Both the MPC50M and MPCV200M have a stainless steel casing, a passive and internal cooling design (no dirt catching cooling ribs), and can be cleaned with all normal cleaning materials. The MPCV200M is rated IP52, therefore optimally protected against invasive moisture, and can be intensively cleaned. In this case the MPCV200M must be mounted with the connectors facing downwards to allow the stainless steel protective housing to be effective.

### Additional Medical Grounding Connection

The MPC50M and MPCV200M include the standard medical potential compensatory connectors.

## MIL-STD-810

The MIL-STD-810 series of standards are issued by the United States Army's Developmental Test Command, to specify various environmental tests to simulate conditions that the tested item will encounter in the field. The current revision, as of 2008, is revision G (i.e. MIL-STD-810G), issued October 31, 2008, superseding revision F (MIL-STD 810F) from January 1, 2000 (last changed May 5, 2003). The methods listed below, along with others, simulate specific

environmental conditions, and are referred to by the specification for the device. There is no certification, qualification or approval from the military although in the course of complying with a contract to supply material that the vendor has tested using MIL-STD-810 procedures, the procuring activity may accept such results as compliant with the contract specification.

For instance (where the older 810E is an example):

**\_ MIL-STD 810E Method 500.3**

Low Pressure (aka Altitude testing)

**\_ MIL-STD 810E Method 501.3**

High Temperature (Both storage and operating)

**\_ MIL-STD 810E Method 502.3**

Low Temperature (Both storage and operating)

**\_ MIL-STD 810E Method 503.3**

Temperature Shock (how well does the device handle going from high to low temps, and back)

**\_ MIL-STD 810E Method 506.3**

Rain (how does the device do in wind blown rain)

**\_ MIL-STD 810E Method 507.3**

Humidity (can the device handle high Humidity)

**\_ MIL-STD 810E Method 508.4**

Fungus (device is exposed to warm moist air in the presence of Fungus to see if it grows on the device)

**\_ MIL-STD 810E Method 509.3**

Salt Fog (does the device rust/fail when exposed to salt fog)

**\_ MIL-STD 810E Method 510.3**

Sand and Dust (how well does the device work when exposed to sand and dust)

**\_ MIL-STD 810E Method 511.3**

Explosive Atmosphere (does the device create enough sparks/etc to cause an explosive atmosphere to blow up)

**\_ MIL-STD 810E Method 512.3**

Leakage

**\_ MIL-STD 810E Method 513.4**

Acceleration (constant acceleration)

**\_ MIL-STD 810E Method 516.4**

Shock (either Shock Response Spectrums, or triangle / sine / square wave shocks) — also transport shock

**\_ MIL-STD 810E Method 519.4**

Gunfire Vibration

**\_ MIL-STD 810E Method 520.1**

Temp, Humidity, Vibration (Traditionally sine wave (pre D), later random vibration — combined with Temp testing)

**\_ MIL-STD 810E Method 521.1**

Icing, Freezing Rain

## Versatile Options for Computer Power-On

### Wake On LAN (WOL)

Computers with this function can be wakened from standby mode over the network from another computer sending a special TCP/IP wake packet. The computer must be configured accordingly for this in advance. The typical application is remote maintenance.

### Wake On Ring (WOR)

Computers with this function can be wakened from a „soft off“ state by an impulse over the ring line of the COM1. For example, a call from a modem or over GSM can turn on the remote computer. The computer must be accordingly configured for this in advance. The typical application is remote maintenance.

### Wake On Move (WOM)

Computers with this function can be wakened from standby mode through mechanical motion in a specific way or along any axes. A 3D acceleration sensor measures the movement and starts the computer when a pre-defined acceleration value is exceeded. Accordingly, the computer must be configured for this in advance. The typical application is property protection and/or tracking systems.

## Scalable Products

MICROSPACE® PCs are scalable over several technologies and performance levels. This lengthens the product availability and allows for application specific voltage performance.

## Long Availability Intel® processors

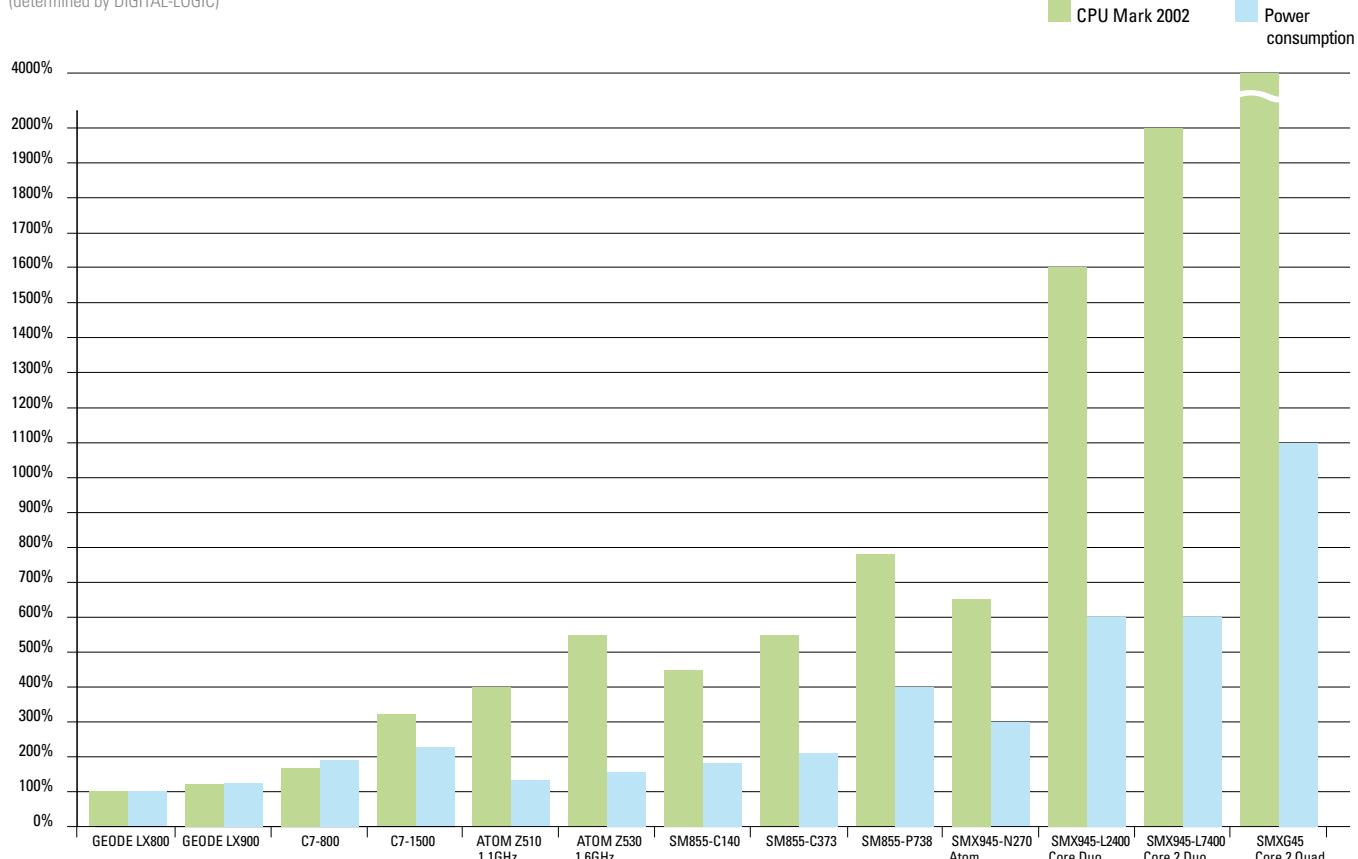

Product	CPU Takt (GHz)	FSB (MHz)	L2 Cache	max. power dissipation CPU	max. power dissipation Chipset	available until	Housing

## CPU comparison of performance and power consumption

(determined by DIGITAL-LOGIC)

## LCD/BIOS adaptation

DIGITAL-LOGIC has the source code for every Core and LCD BIOS that is used; this allows us to make customer-specific modifications if required. LCDs are adapted to DIGITAL-LOGIC PCs for a flat fee. The customer provides the LCD data sheet, the LCD connector and the monitor including backlight converter.

## Atom video BIOS/driver standard resolutions

Resolution	DVI (60Hz)	LVDS**

\*\*The desired resolution must be individually adapted to the LCD display.

## Hard Disk and Solid State Disk Information

DIGITAL-LOGIC uses only top quality hard drives in its MICROSPACE® computer systems. Special hard drives can be ordered (optional) for use in harsh in-vehicle environments or for continuous 24-hour operation. The following comparative table shows the technical details and the different order numbers:

Model	Hard Disk Standard	Hard Disk Standard	16GB SSD	Solid State Disk SATA	Harddisk 40GB HD 24h Automotive	Harddisk 80GB HD 24h Automotive
Capacity	160GB	320GB	16GB	32GB	40GB	80GB
Interface	PATA-6	SATA2	PATA-6	SATA-2	PATA-6	SATA
Disks	2	2	Flash	Flash	1	1

CF 1.0GB-IG-E48	890036	CompactFlash Card 1024MB-IG, Type SSD-CnnMI-3512
CF 2.0GB-IG-E48	890038	CompactFlash Card 2048MB-IG, Type SSD-CnnMI-3512

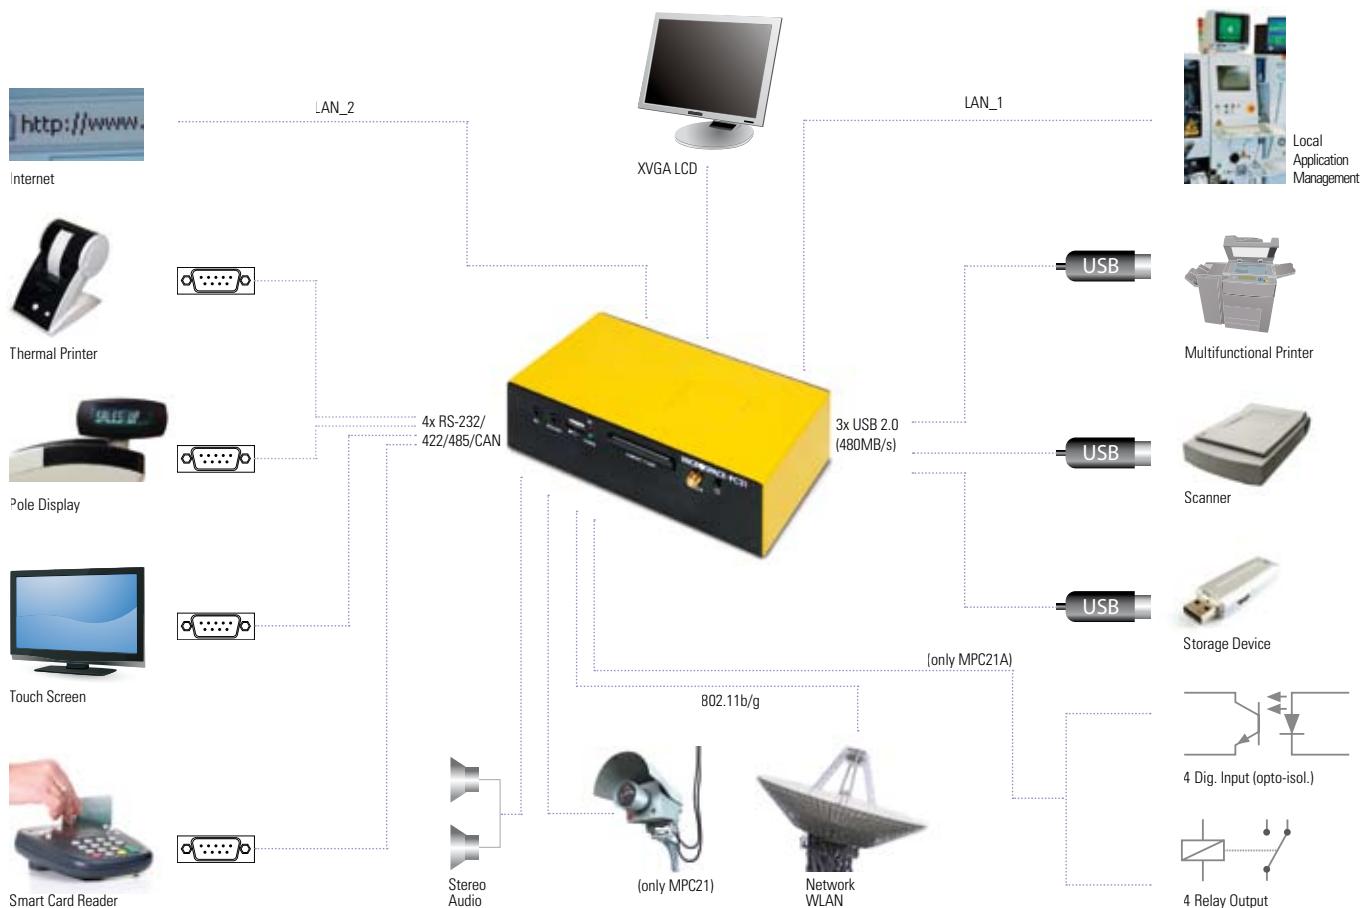

## Board Support Package (BSP)

Board Support Packages are free of charge and may be downloaded from our website or ordered using the following part numbers.

BSPs contain all drivers and installation tools for most operating systems:

Article	No.	Operating system	Product Range
BSP-CD855	816210	DOS, Linux, WIN-XP	Intel 855GME
BSP-CD945	816212	Linux, WIN-XP, Vista	Intel 945GME
BSP-CDLX800	816213	DOS, Linux, WIN-XP, CE5	AMD LX800/900
BSP-CDP5T3	816214	DOS, Linux, WIN-XP	Intel Tualatin, AMD ELAN520
BSP-CDA200	816216	Linux, WIN-XP, Vista, CE6	Atom Z510, Z530
BSP-CDG45	816217	Linux, WIN-XP, Vista	Intel G45

# MPC20/L

The smallest, fanless industrial computer

The MPC20 has all the standard interfaces (USB, LAN, VGA, audio). With the LX processor, the system typically only needs 10 Watts. For mass storage, besides the CompactFlash on the front, an optional hard drive is available. The housing is of rugged sheet steel with various mounting options (see Accessories).

## Applications

- \_ Information terminals
- \_ Linux microcomputer
- \_ Firewall
- \_ External 110/220VAC power pack

# MPC21/A/B/C

The fan-free, energy-efficient mini-industrial computer

The MPC21/A/B/C includes all the standard interfaces (COMs, USB, LAN, VGA, audio) and is internally expandable with a PCI/104 card. With the LX800 processor, the system typically needs only 10 Watts. Besides the CompactFlash on the front, an optional hard drive is available for mass storage. The robust sheet steel housing has various mounting possibilities (see Accessories).

## Applications

- \_ Information terminals
- \_ Cash register systems
- \_ Measurement technology, data capture
- \_ External 110/220VAC power pack

# MPC25/L

The smallest, fanless, multimedia Atom computer

The MPC25/L has all the standard interfaces (USB, LAN, DVI, audio). With the Atom processor, the system only typically needs 12 Watts. For mass storage, besides the CompactFlash on the front, an optional SATA hard drive is available. The housing is of rugged sheet steel with various mounting options (see Accessories).

## Applications

- \_ Information terminals
- \_ NetPC, XP embedded
- \_ Hardware MPEG4 decoder
- \_ Firewall
- \_ External 110/220VAC power pack

# MPC26/A/L

The fan-free, energy-efficient Atom mini-industrial computer

The MPC26/A/L includes all the standard interfaces (COMs, USB, LAN, DVI, audio) and is internally expandable with a PCI/104 card. With the Atom processor, the system typically only needs 12 Watts. Besides the CompactFlash on the front, an optional SATA hard drive is available for mass storage. The robust sheet steel housing has various mounting possibilities (see Accessories).

## Applications

- \_ Information terminals
- \_ Hardware MPEG4 decoder
- \_ Measurement technology, data capture
- \_ External 110/220VAC power pack

## Accessories for MPC2x models

**Top-hat rail mounting kit** (Part no. 812031) .....

Mounting plate with retaining clips for installing the MPC2x on a DIN top-hat rail (in the control cabinet). The MPC2x is screwed onto the mounting plate.  
(top hat rail not included)

**90° top-hat rail mounting kit** (Part no. 812030) .....

Mounting bracket with retaining clips for vertical installation of the MPC2x on a DIN top-hat rail (in the control cabinet). The mounting kit is screwed onto the MPC2x.  
(top hat rail not included)

**Wall mounting kit** (Part no. 812032) .....

Mounting plate for easy installation of the MPC2x on a wall (wood, metal, cement, plaster). The MPC2x is screwed onto the mounting plate.

**Mounting base** (for MPC20/25, Part no. 812033) (for MPC21/26, Part no. 812034) .....

Mounting base for vertical installation of the MPC2x on a table. The MPC2x is screwed onto the mounting base.

**DC power plug** (Part no. 812035) .....

DC power plug for cable fanning suitable for all MPC2x models.

**DC power cable** (Part no. 812036) .....

Suitable for MPC20 and MPC25 models.

## SLAX Linux for MPC2x models

SLAX is a bootable CompactFlash containing the Linux operating system. It requires 185MByte and runs directly from the CF without installation. SLAX-Linux is based on the Slackware Linux distribution and the customer can also download this directly as an ISO file ([www.slax.org](http://www.slax.org)). All scripts and source codes are freely available and may be used to develop one's own Live CF/CD.

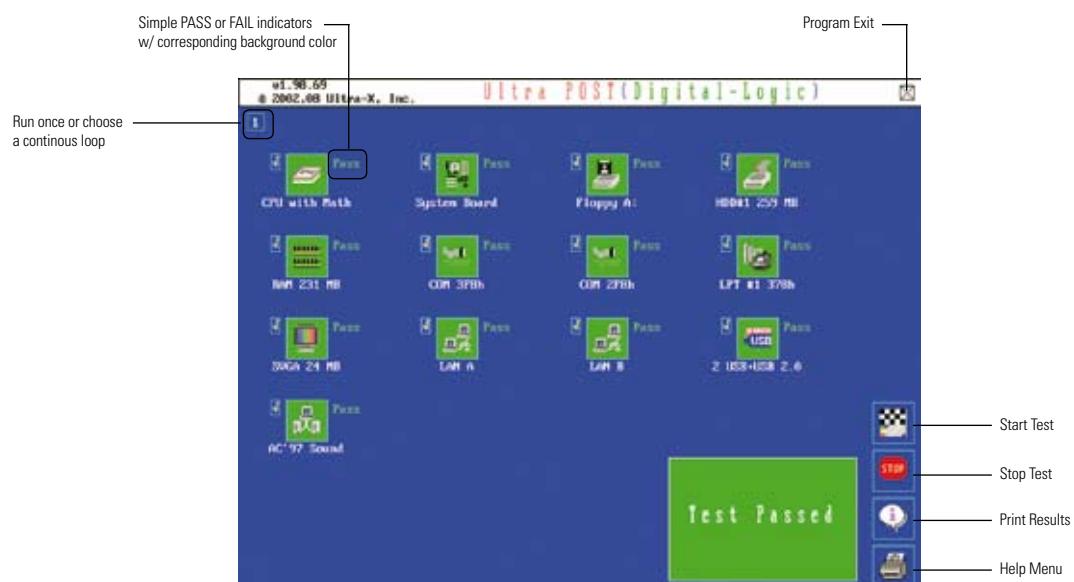

### SLAX CompactFlash (CompactFlash 816030) contains:

- \_ Linux kernel 2.6, offering excellent hardware support
- \_ the newest ALSA sound drivers
- \_ KDE 3.5, an excellent desktop software
- \_ webconfig feature allowing you to save your session data to slax's web

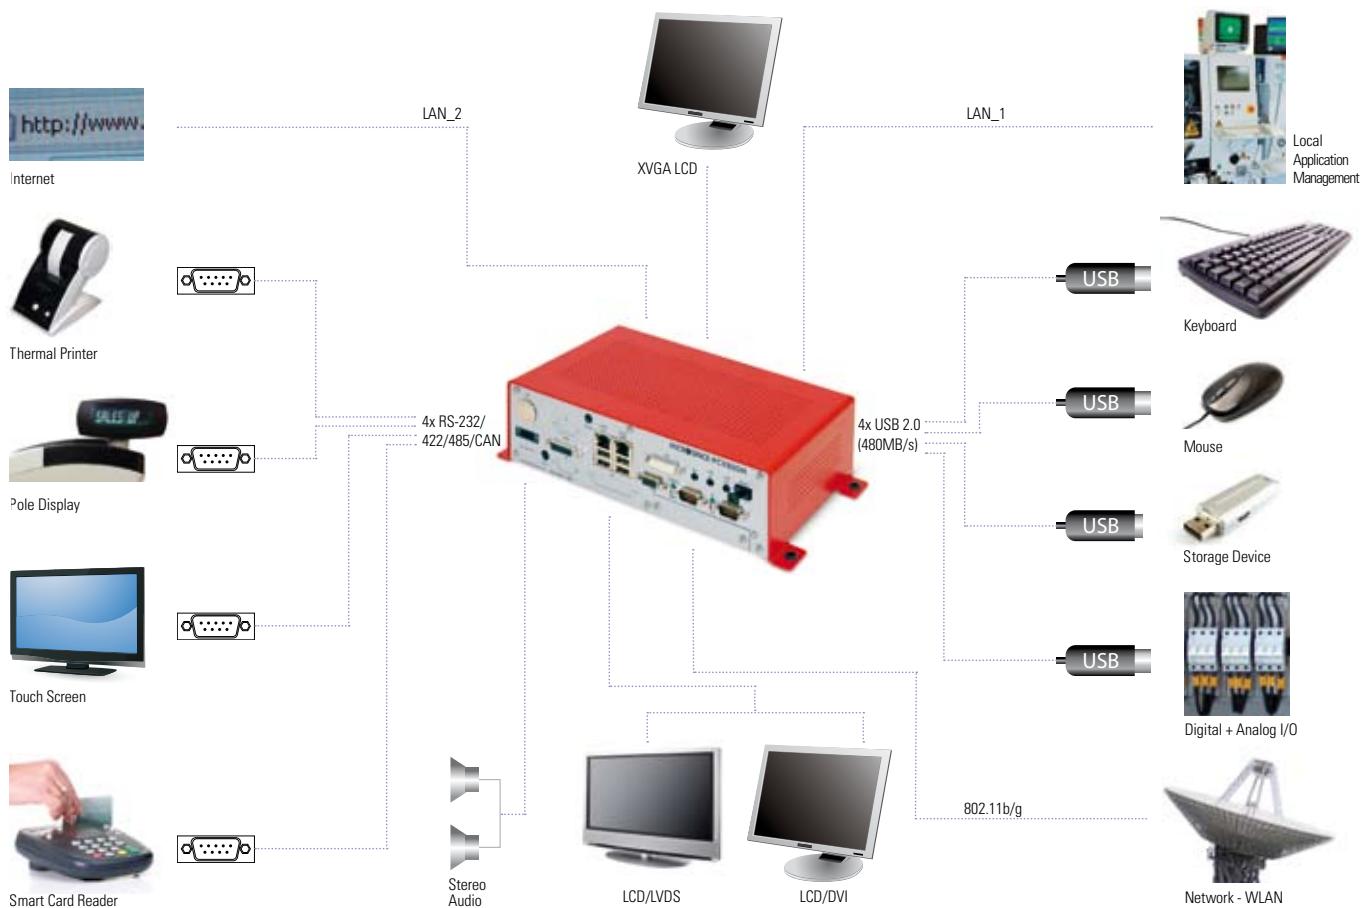

## BIOS Self-Test

Integrated in all MPC20/2A and MPC25/26 devices is a diagnostic tool to self-test the system functions of the BIOS. This self-test can be started in the BIOS with <Alt> + <D> without a boot of the operating system.

# MPCV200

The fanless, energy-efficient, expandable Atom industrial computer

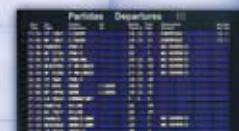

The MPCV200 has all the standard interfaces (COMs, USB, LAN, VGA) and is internally expandable with two PCI/104 cards. The system typically only requires 12 Watts with the Atom processor. An exchangeable SATA hard drive on the front is available for mass storage. For additional functional expansion, Dsub interfaces X1, X2 and X3 are already prepared on the front plate. The housing is of rugged sheet steel with an integrated passive, maintenance-free cooling design. Customer specific functions such as Ring On Wake, Event Wake Up or Wake On LAN can be realized using FPGA and a microcontroller.

## Applications

- \_ Software PLC, control computer
- \_ Measurement technology, data capture
- \_ External 110/220VAC power pack

# MPC40

The fanless industrial computer

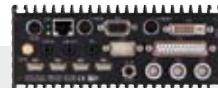

The MPC40/A/C is based on the Intel Pentium-M with 2 independent video displays (DVI, VGA, LVDS). For mass storage, a hard drive is built-in. Several variations of FireWire, 3x LAN or 3x video frame grabber are available. A rugged aluminum profile integrates passive, fanless cooling for absolutely noiseless and maintenance-free operation.

## Applications

- \_ Video surveillance
- \_ Firewall, communication bridge
- \_ Data capture computer
- \_ FireWire camera computer

# MPCX48A

The compact industrial computer

The MPCX48A is based on the Intel Pentium ZC with 2 independent video displays (DVI, VGA, LVDS). A hard drive, a CompactFlash card and two USB memory stick brackets are built-in as mass storage. Expansion options include GPS, GSM and WLAN. Absolutely noiseless and maintenance-free operation is achieved through a robust aluminum profile which integrates passive and fan-free cooling.

## Applications

- \_ Digital I/Os, optional CAN
- \_ Software PLC computer, data capture computer
- \_ Measurement technology capture
- \_ For 12-24V power supplies

# MPCF50/A

The fan-free, 42mm thin wall-mountable computer

The MPCF50/A operates on a Core Duo multiprocessor with 2GByte memory. This system includes all the standard interfaces (USB, LAN, DVI, VGA, sound) and is extremely thin (42mm) allowing it to fit behind every monitor. A passively cooled SATA300 hard drive is built-in for mass storage. The housing is made of rugged aluminum with integrated passive, maintenance-free cooling. The MPCF50A version has 4 integrated LAN ports.

# MPC50

The fanless, high performance, graphics computer

The MPC50 operates on a Core2Duo multiprocessor with 2GByte memory. This system has all the standard interfaces (USB, LAN, DVI, VGA, sound, FireWire) and is expandable with two PCI cards or two PCIe cards. For mass storage, a passively cooled SATA300 hard drive with up to 1TB capacity is built-in (a second drive is optionally available). The robust aluminum housing has an integrated passive, maintenance-free cooling design. Two passively cooled video cards (PEG/PClexpress) are available as options to be built-in, allowing 4 monitors to be connected.

## Applications

- \_ Video/audio data processing for studio technology
- \_ Multimedia applications
- \_ Optional high performance graphics with four separate video outputs
- \_ Built-in 110/220VAC power pack
- \_ For maintenance-free, 24 hour, continuous operation applications

# MPCR50

The fan-free, Core2Duo, 19" computer system

The MPCR50 has many interfaces (COMs, USB, LAN, DVI, sound, video input) and is expandable with PCI slots and PC/104express cards (e.g., CAN, measurement cards). For mass storage, a „hot plug“ exchangeable SATA300 hard drive is built-in (a second drive is optionally available); RAID interconnection is also possible. The RTC battery is monitored and service-friendly, being accessible from the front. For expansion there are optional GPS, GSM and WLAN as well as slots for CompactFlash and Express cards. The housing is made of rugged chromium steel with integrated passive, maintenance-free and fanless cooling. Customer specific functions such as Ring On Wake, GSM Wake, Event Wake Up or Wake On LAN can be realized using FPGA and a microcontroller. By means of a color LCD display and 6 function buttons, various security functions and system information (voltages, temperatures, error reports, POD diagnostics, operating log, RTC battery voltage) can be queried.

## Applications

- \_ Integration in stationary 19" rack systems
- \_ Studio technology, traffic surveillance
- \_ Security technology, video server
- \_ Multimedia server
- \_ Built-in 110/220VAC feed

\*A, B, C, D interfaces depend on the built-in PCI/104e cards or their respective slots

# MPCV200M

The fanless, EN60601 certified, energy efficient medical computer (Atom based)

The MPCV200M includes all standard interfaces (COMs, USB, LAN, VGA) and is internally expandable with two PC/104express cards. A SATA300 hard drive is built-in for mass storage. The system is protected against too high patient discharge currents and has a medical technological grounding connection. The rugged, closed and easy-care chromium steel housing uses an integrated, passive, maintenance-free cooling design. The omission of a fan prevents any contaminants from infiltrating the computer.

option 814325,  
front cover

# MPCX28

The compact and energy-efficient vehicle computer

The MPCX28 is based on the Intel Atom processor and typically only needs 12 Watts power consumption. On the front is an exchangeable, robust SATA hard disk (a flash disk is optional) as well as a CF bracket. Expansion options include GPS, GSM and WLAN. Absolutely noiseless operation is achieved through a rugged aluminum profile which integrates passive and fan-free cooling. Other functions (e.g. CAN) can be integrated by the manufacturer through PCI/104 cards. Customer specific functions such as Ring On Wake, Event Wake Up or Wake On LAN can be realized using FPGA and a microcontroller.

## Applications

- \_ Integration in cars, busses, trucks
- \_ Passenger entertainment, communication, measurement computer
- \_ For 12-48V motor vehicle battery power supplies
- \_ e1 certified

# MPCX47

The versatile measurement technology vehicle computer

The MPCX47 is based on the Intel Pentium-M with 2 independent video displays (DVI, VGA, LVDS). For mass storage, a rugged hard drive (a flash disk is optional), a CompactFlash card and two USB memory stick brackets are built-in. The mass storage is service-friendly, being accessible from the front. Expansion options include COM3/4, CAN, GPS, GSM and WLAN. A robust aluminum profile integrates passive, fanless cooling for absolutely noiseless operation.

## Applications

- \_ Integration in cars, busses, trucks
- \_ Mobile control and measurement technology (analog, digital)
- \_ For 12-24V motor vehicle battery power supplies
- \_ e1 certified

# MPCX50

The fan-free, expandable Core2Duo vehicle computer

The MPCX50 has many interfaces (COMs, USB, LAN, digital I/O, video input) and is expandable with PCI slots and PC/104express cards (e.g., CAN, measurement cards). For mass storage, a rugged hard disk or SSD drive is built-in. The RTC battery is monitored and service-friendly, being accessible from the front. as slots for CompactFlash and Express cards. The housing is made of rugged chromium steel with integrated passive and fanless cooling. Customer specific functions such as Ring On Wake, GSM Wake, Event Wake Up or Wake On LAN can be realized using FPGA and a microcontroller. By means of a color LCD display and 6 function buttons, various security functions and system information (voltages, temperatures, error reports, POD diagnostics, operating log, RTC battery voltage) can be queried. An external 12V secondary battery can be connected to bridge power failures of the primary feed.

## Applications

- \_ Integration in cars, busses, trucks (e1 certified)
- \_ Passenger entertainment, passenger safety
- \_ Expandable, e.g. with 8x COM, 8x LAN
- \_ Built in video frame grabber

\*A, B, C, D interfaces depend on the built-in PCI/104e cards or their respective slots

# MPCX27R/RL

The EN50155 certified, IP65 protected, Atom rail computer  
(with display)

The MPCX27R is well sealed against water and has waterproof N/M12 cable connections. For mass storage, a flash disk is built-in (SATA SSD or optional CompactFlash). The RL version has a built-in 3.5" VGA touch screen. For navigation and communication expansion, the options GPS, GSM and WLAN with watertight antenna connections are available. The aluminum housing is totally watertight and includes passive, fanless cooling. The Atom processor offers high computer performance with only 15 Watt power consumption. Customer specific functions such as Ring On Wake, Event Wake Up or Wake On LAN can be realized using FPGA and a microcontroller.

## Applications

- \_ Integration in railway vehicles
- \_ Communication computer, passenger safety
- \_ For 24-110V galv. 1.5kV isolated rail power supply
- \_ EN50155, TX certified, M12 connectors, 1500V isolation

front cover

# MPCX28R

The fanless Atom rail computer EN50155

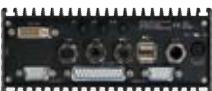

The MPCX28R includes all the standard interfaces (COMs, Video, Sound, USB, LAN) as well as an additional external eSATA300 connector. On the front is an exchangeable SATA300 hard disk or SSD drive as well as a CF bracket for mass storage. The RTC battery is service-friendly, being accessible from the front. Expansion options include GPS, GSM and WLAN. The housing is a robust aluminum profile which integrates passive, maintenance-free and fan-free cooling. Customer specific functions such as Ring On Wake, Event Wake Up or Wake On LAN can be realized using FPGA and a microcontroller.

# MPCR50R

The fan-free, Core2Duo, 19" rail computer EN50155

The MPCR50 has many interfaces (COMs, USB, LAN, Digital I/O, video input) and is expandable with PCI slots and PC/104express cards (e.g., CAN, measurement cards). For mass storage, a shock-absorbing, „hot plug“ exchangeable SATA300 hard drive or SSD drive is built-in (a second drive is optionally available) The RTC battery is monitored and service-friendly, being accessible from the front. For expansion there are optional GPS, GSM and WLAN as well as slots for CompactFlash and Express cards. The housing is made of rugged chromium steel with integrated passive, maintenance-free and fanless cooling. Customer specific functions such as Ring On Wake, GSM Wake, Event Wake Up or Wake On LAN can be realized using FPGA and a microcontroller. By means of a color LCD display and 6 function buttons, various security functions and system information (voltages, temperatures, error reports, POD diagnostics, operating log, RTC battery voltage) can be queried. An external 12V secondary battery can be connected to bridge power failures of the primary feed.

## Applications

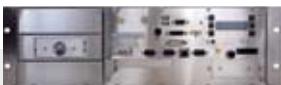

- \_ Video server in railway vehicles, passenger entertainment, passenger safety
- \_ Expandable, e.g. with 8x COM, 8x LAN
- \_ For 24-110V galv. 1.5kV isolated rail power supply
- \_ EN50155, TX certified, M12 connectors

\*A, B, C, D interfaces depend on the built-in PCI/104e cards or their respective slots

# MPCF50R

The fanless and thin, passenger information rail computer

The MPCF50R has the same interfaces as the MPCR50R (COMs, USB, LAN, VGA, DVI) and uses the same computer electronics. The system is built mechanically very thin (<60mm) so that it finds room behind any LCD display. An onboard CompactFlash, a 2.5" SATA hard drive (80GB) or a 2.5" SSD (32GB) is available for mass storage. Customer specific security functions can be realized using FPGA and a microcontroller and visualized over a color LCD display.

## Applications

- \_ Passenger entertainment and information
- \_ Advertising displays in busses and railway vehicles

# MPCX27MIL

The IP67 protected computer with MIL connectors

The MPCX27MIL is well sealed against water and has waterproof MIL cable connections. A flash disk is built-in (SATA 40GB SSD or optional CompactFlash) for mass storage. The Atom processor offers high computer performance with only 12 Watt power consumption. For expansion, optional GPS, GSM and WLAN with waterproof N-type antenna connectors are available. Functional expansion is possible with an internal PCI/104express card and the signals use a 48pin MIL connector. A very robust aluminum housing integrates passive, fanless cooling to allow a broad working temperature range.

## Applications

- \_ Integration in military vehicles and aircraft
- \_ MIL-STD 810G certified, -40C to +85C
- \_ For 24-48V battery power supplies
- \_ 16G vibration, 150G shock

# MPCX47MIL

The IP65 protected, water-proof computer with MIL connectors

The MPCX47MIL is well sealed against water and has waterproof MIL cable connections. For mass storage, a flash disk is built-in (PATA SSD or CompactFlash and 2x USB sticks). The mass memory can be swapped out from the front. For expansion, optional GPS, GSM and WLAN with waterproof FAKRA antenna connectors are available. The aluminum housing integrates passive, fan-free cooling. Customer specific functions such as Ring On Wake, GSM Wake or Wake On LAN can be realized using FPGA and a microcontroller.

## Applications

- \_ Integration in cars, busses, trucks
- \_ For use outdoors
- \_ For 12/24V battery power supplies
- \_ e1 certified

# MSMD160

Multiple display solution via USB

The MSMD160 allows expansion of up to 6 monitors (DVI/VGA) using the USB 2.0 interfaces. The displays can be defined as clones (copies) or display expansions (separate display contents). Drivers are available for Windows Vista, XP and LINUX. Other options via USB are sound output (2x 10W stereo) and a touch screen.

## Applications

- \_ Simulators
- \_ Large displays
- \_ Multimedia
- \_ Passenger information in vehicles/aircraft

[www.digitallogic.com](http://www.digitallogic.com).

# MPCXHMI

The user interface for all functionality in the  
**DIGITAL-LOGIC** vehicle computer **MPCX48/50**

MPCXHMI is a user interface that has been specially programmed for the two DIGITAL-LOGIC, MPCX48 and MPCX50 vehicle computers with touch screen monitors. This is based upon Microsoft Windows XP Embedded. The interface uses large, ergonomically designed controls (buttons, dials) that are easy to operate via the touch screen while driving.

## Ordering information

Item	No.	Description
MPCX47HMI	814500	SW-Package
MPCX48HMI	814510	SW-Package

## The MPCXHMI operating concept

In order to provide a clear and uniform display of all information and content, the MPCXHMI is clearly divided into:

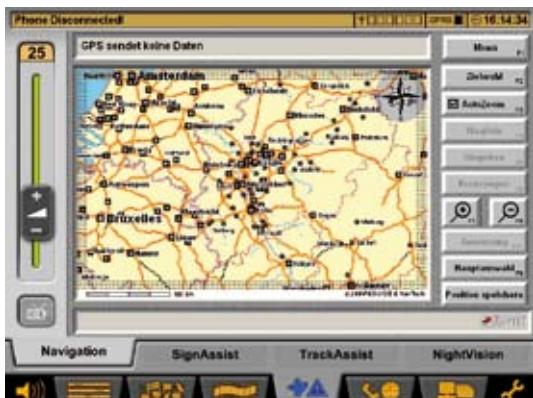

- \_ The display line
- \_ The application
- \_ The main menu
- \_ The sub menu

The menu buttons at the bottom edge of the screen allow the current application to be accessed easily. Only the menu items that are currently needed are displayed.

The following unique characteristics have been integrated:

- \_ Ergonomic operation for the vehicle workplace
- \_ Intuitive operation without a user guide
- \_ Text entry using an on-screen keyboard on the touch screen or a wireless keyboard
- \_ Day and night design (reduced brightness)
- \_ Integration of Windows standard applications
- \_ Operation of all functions such as:
  - Navigation
  - DVD player
  - Audio CD player
  - MP3 player
  - Video player
  - Picture viewer
  - Telephone with SMS
  - E-mail
  - Internet browser (UMTS)
  - Control of digital outputs
  - Display of digital inputs
  - Display and recording of video input channels
  - Office

DV monitor 12"-T with spherical head,  
aluminium bracket Part no. 814456

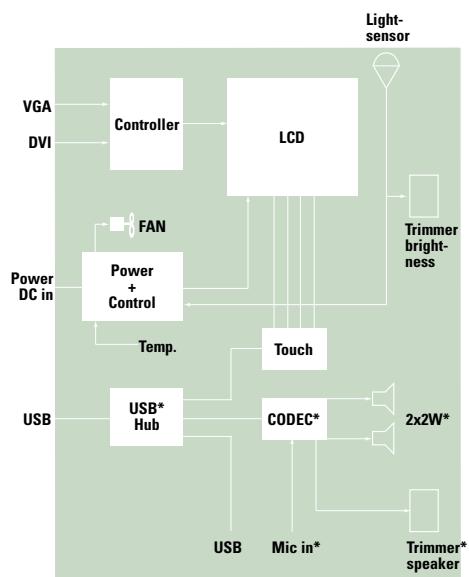

# VEHICLE MONITORS

The DV monitor is a universally deployable LCD monitor for mobile and vehicle applications

It is becoming increasingly important in the public sector to have up-to-date information. Images and films with audio are presented on plasma or LCD displays using computers. Displays and computers are subjected to considerable temperature fluctuations and dust in locations that are difficult to access, often on walls or ceilings in buildings or outdoors.

## Applications

- \_ Display computers for control terminals
- \_ Advertising display systems
- \_ In-vehicle installation

\*Option 814454

## Ordering information

Item	No.	Description
DV monitor 6.5-T	814406	6.5" LCD with DVI touch screen, VGA, USB interface, power supply 8V-28V
DV monitor 8.4-T	814408	8.4 LCD with DVI touch screen, VGA, USB interface, power supply 8V-33V
DV monitor 10.4-T	814410	10.4" LCD, LED backlight with DVI touch screen, VGA, USB interface, power supply 8V- 33V
DV monitor 12-T	814412	12" LCD with DVI touch screen, VGA, USB interface, power supply 8V-33V
DV bracket	814450	Spherical head bracket with prism bracket for VESA base
DV VESA base	814452	VESA installation base with retaining prism
DV bracket 2109	814456	Spherical head aluminium bracket with height adjustable VESA base (pic.)
DV bracket 2105	814458	Standard spherical head bracket with height adjustable VESA base
DV bracket 1022	814460	Heavy duty monitor bracket with metal spherical head and clamp foot
DV bracket 1301	814467	Stationary stand with suction cup bracket
DV bracket 1300	814468	Stationary stand with star handle
DVI cable 2M	814462	DVI cable, 2 metres
DVI cable 3M	814463	DVI cable, 3 metres
DVI cable 5M	814465	DVI cable, 5 metres
Option-USB-Sound	814454	USB hub plus USB sound for 8.4"-12.1" DV monitors incl. 2x 2W speakers
Option HHDV12	814451	Handheld for DV-12-T
Option SLT8.4"	814453	Sunlight readable touchscreen for 8.4"

## Technical data

### DV monitor 12.1" - T

<b>Display</b>	12.1" LCD TFT monitor, LED backlight
<b>Resolution</b>	1024 x 768 XGA, 262k colours
<b>Brightness</b>	1000 cd/m <sup>2</sup> adjustable (Poti, Sensor)
<b>Contrast</b>	800 : 1
<b>Touchscreen</b>	Analog resistive
<b>Video input</b>	VGA-CRT, DVI
<b>Touch output</b>	USB, option: USB hub + sound
<b>Power supply</b>	8-33VDC, protected, 27W
<b>Cabling</b>	3 separate single cables (Video, DC, USB)
<b>Dimensions, weight:</b>	292 x 232 x 43mm, 1.7kg
<b>Colour</b>	Black, aluminium casing
<b>Attachment/installation</b>	VESA standard 75 x 75mm, M4
<b>Operating temperature</b>	-20°C bis +60°C, IP30, e1

## Technical data

### DV monitor 6.5" - T

<b>Display</b>	6.5" LCD TFT monitor (2x CCFL)
<b>Resolution</b>	640 x 480 VGA
<b>Brightness</b>	600 cd/m <sup>2</sup> adjustable (Poti, Sensor)
<b>Contrast</b>	600 : 1
<b>Touchscreen</b>	Analog resistive
<b>Video input</b>	VGA-CRT
<b>Touch output</b>	USB
<b>Power supply</b>	8-28VDC, protected
<b>Cabling</b>	3 separate single cables (Video, DC, USB)
<b>Dimensions, weight:</b>	207 x 151 x 35mm
<b>Colour</b>	Black, aluminium casing
<b>Attachment/installation</b>	VESA standard 75 x 75mm, M4
<b>Operating temperature</b>	-10°C to +70°C, IP30, e1

### DV monitor 8.4" - T

<b>Display</b>	8.4" LCD TFT monitor (2x CCFL)
<b>Resolution</b>	800 x 600, SVGA
<b>Brightness</b>	650 cd/m <sup>2</sup> adjustable (Poti, Sensor)
<b>Contrast</b>	600 : 1
<b>Touchscreen</b>	Analog resistive
<b>Video input</b>	VGA-CRT, DVI
<b>Touch output</b>	USB, option: USB hub + sound
<b>Power supply</b>	8-33VDC, protected, 11W
<b>Cabling</b>	3 separate single cables (Video, DC, USB)
<b>Dimensions, weight:</b>	218 x 182 x 39mm, 1kg
<b>Colour</b>	Black, aluminium casing
<b>Attachment/installation</b>	VESA standard 75 x 75mm , M4
<b>Operating temperature</b>	-10°C to +70°C, IP30, e1

### DV monitor 10.4" - T

<b>Display</b>	10.4" LCD TFT monitor, LED backlight
<b>Resolution</b>	1024 x 768, XGA, 16Mio. colors
<b>Brightness</b>	1000 cd/m <sup>2</sup> adjustable (Poti, Sensor)
<b>Contrast</b>	800 : 1
<b>Touch screen</b>	Analog resistive
<b>Video input</b>	VGA-CRT, DVI
<b>Touch output</b>	USB, option: USB hub + sound
<b>Power supply</b>	8-33VDC, protected, 27W
<b>Cabling</b>	3 separate single cables (Video, DC, USB)
<b>Dimensions, weight:</b>	250 x 201 x 43mm, 1.3kg
<b>Colour</b>	Black, aluminium casing
<b>Attachment/installation</b>	VESA standard 75 x 75mm, M4
<b>Operating temperature</b>	-10°C to +60°C, IP30, e1

# TECHNICAL INFORMATION

## RS232C cables

Serial adapter connector: male 25-Pin DSub unlisted pins have no connection.

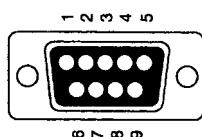

Pin	I/O	Description
1		NC (Shield GND. Other End)
2	>	TX (Transmit Data)
3	<	RX (Receive Data)
4	>	RTS (Request to Send)
5	<	CTS (Clear to Send)
6	<	DSR (Data Set Ready)
7		GND (Signal Ground)
8	<	DCD (Data Carrier Detect)
9	>	+Transmit Current Loop Data
11	>	-Transmit Current Loop Data
18	<	+Receive Current Loop Data
20	>	DTR (Data Terminal Ready)
22	<	RI (Ring Indicator)
25	<	-Receive Current Loop Data

Alternate adapter connector: Male 9-Pin, DSub:

Pin	I/O	Description
1	<	DCD (Data Carrier Detect)
2	<	RX (Receive Data)
3	>	TX (Transmit Data)
4	>	DTR (Data Terminal Ready)
5		GND (Signal Ground)
6	<	DSR (Data Set Ready)
7	>	RTS (Request to Send)
8	<	CTS (Clear To Send)
9	<	RI (Ring Indicator)

CAN allocation: connector, 9-Pin, DSub:

Pin	I/O	Description
