REDFOX DEFENCE

Products and Systems for Defense Technology

Support for alternative operational commands.

Product Features

The REDFOX DEFENCE system family includes all essential networkable equipment components. Extreme reliability, durability and robustness are guaranteed in any configuration by the following characteristics: comprehensive protection against ingress of dust and water, electromagnetic immunity, resistance to shock and vibration, and an extended temperature range.

Solutions for Military Applications

The following application sectors are particularly suitable for use of REDFOX DEFENCE products:

Army

- Armoured Battle Vehicles
- Tactical and Command Vehicles
- Unmanned Ground Vehicles

Air Force

- Helicopters
- Planes
- Unmanned Air Vehicles

Navy

- Seaplanes
- Marine Vessels
- Submarines

REDFOX XTREME

Computer Platform for Industrial Application

Guaranteed high autonomy under extreme conditions.

No Limits

The REDFOX XTREME system family is a high-grade product range that is developed specifically for industries with out-of-the-ordinary requirements. Extreme reliability, durability and robustness are guaranteed in any configuration by the following characteristics: comprehensive protection against ingress of dust and water, electromagnetic immunity, resistance to shock and vibration, and an extended temperature range.

Performance with Reliability

The following sectors are particularly suitable for using REDFOX XTREME products:

Protection

- Access Control Systems
- Border Patrol
- Police

Rescue

- Fire Department
- First Aid
- Sea Rescue

Industry

- Power Generation
- Mining and Tunneling Industries
- Construction Machinery

REDFOX AG

We realize your Vision

Mission

REDFOX AG designs, manufactures and markets ruggedized computers and systems for 24/7 operations. REDFOX computer systems are built into stationary and mobile equipment for use in harsh environments. In conjunction with partners, innovative products and services are manufactured to meet customer requirements.

Ruggedized Computers - Made in Switzerland

REDFOX AG is based in Switzerland, which enables a sustainably high level of quality. The original firm of Mettler & Fuchs AG was founded in 1985, to provide defense and industrial clients with specific hardware and software solutions. REDFOX AG was formed in 2010 to specialize in ruggedized computer platforms. A workforce of about 50 implements customized solutions for individual clients, to the highest quality standards.

Competence and Hightech

REDFOX AG offers its clients products and services that meet the most stringent requirements in terms of operational reliability and performance. Modular design enables customer specific configurations with short turn-around times. REDFOX systems integration is a main support feature.

Win / Win and More

Send us your specific requirements. We will offer you a compelling and sustainable solution.
